Tableau des actions

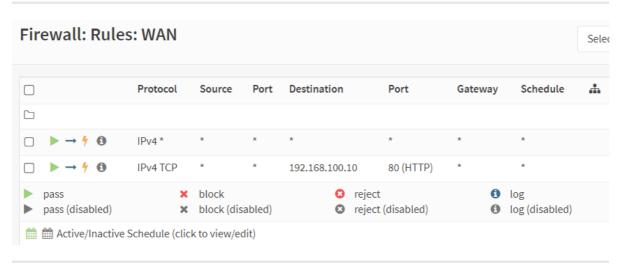

• Identique a Rapport 1 - DMZ

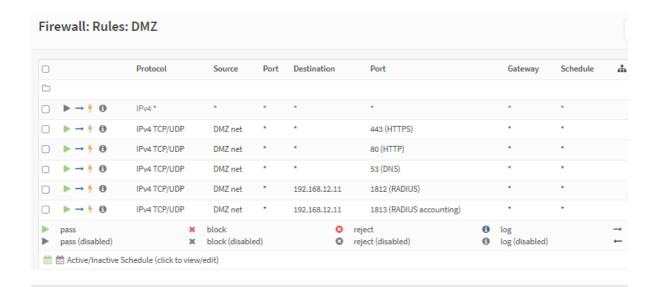

Tableau règles firewall

Source	Destination	Protocol	Act
All	All	ICMP	Accept
192.168.12.0/24	192.168.100.10:8080	TCP/UDP Squid	Accept
192.168.12.0/24	192.168.12.1	Any	Accept
192.168.12.0/24	192.168.100.10/24:22	TCP/UDP SSH	Accept
192.168.12.0/24	Any	Any	Drop
All	192.168.100.10:80	TCP HTTP	Accept
192.168.100.0/24	Any :443	TCP/UDP HTTPS	Accept
192.168.100.0/24	Any :80	TCP/UDP HTTP	Accept
192.168.100.0/24	Any :53	TCP/UDP DNS	Accept
192.168.100.0/24	192.168.12.11:1812	TCP/UDP RADIUS	Accept
192.168.100.0/24	192.168.12.11:1813	TCP/UDP RADIUS ACCOUNTING	Accept

Images avec règles firewall

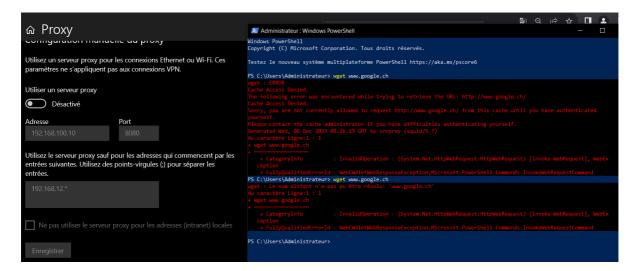

Test d'accès internet en direct (sans proxy)

- Image doit montrer que ce n'est pas possible, par exemple un ping vers un site externe

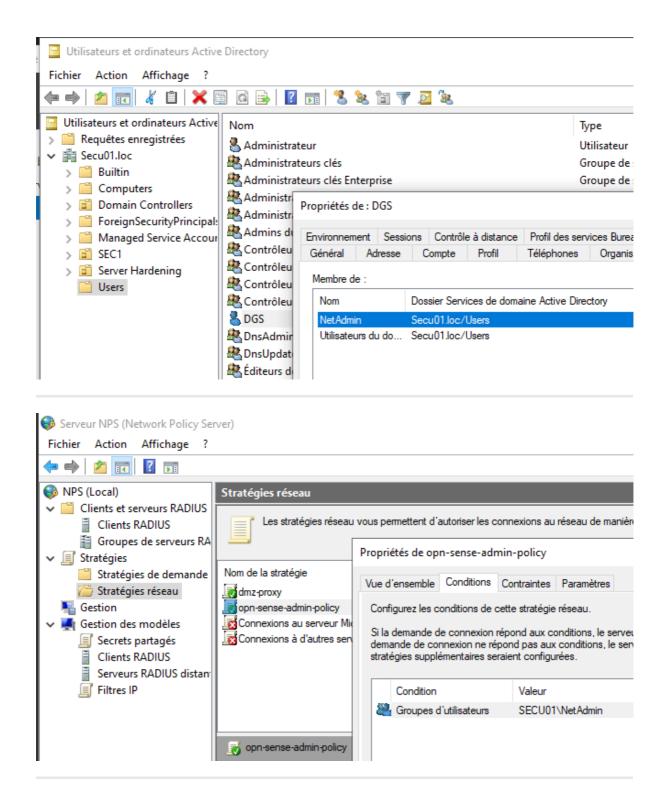

Test d'accès à Internet par le proxy

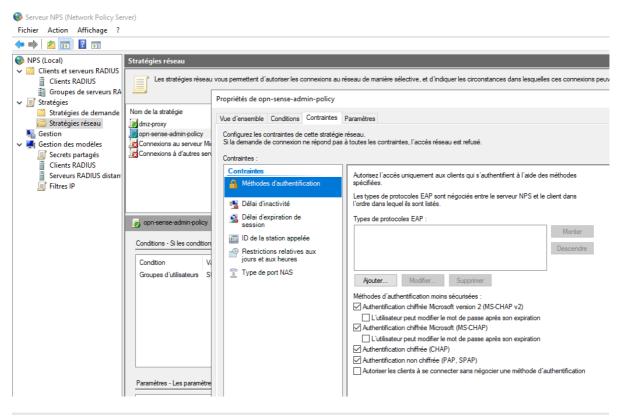

- Image doit montrer que c'est possible à l'aide du proxy
- wget www.google.ch avec proxy : Demande de authentification
- wget sans proxy : non résolu

Accès authentifié au proxy

Config du fichier /etc/squid/squid.conf : Configuré dans conf.d pour savoir mieux ce que on rajoute

```
cpnv@srvprxy:/etc/squid/conf.d$ cat sec2.conf
#Proxy Auth
auth_param basic program /usr/lib/squid/basic_radius_auth -f
/etc/squid/radius.conf
auth_param basic children 5
auth_param basic realm Web-Proxy
auth_param basic credentialsttl 5 minute
auth_param basic casesensitive off
# HTTP Port
http_port 192.168.100.10:8080
cache_dir ufs /var/spool/squid 100 16 256
# ACL List
acl lannet src 192.168.12.0/24
acl dmznet src 192.168.100.0/24
acl whitelist dstdomain "/etc/squid/conf.d/sites.whitelist.txt"
acl radius-auth proxy_auth REQUIRED
# Access list
# http_access allow lannet
# http_access allow dmznet
# http_access allow whitelist
http_access allow radius-auth whitelist
# Blacklist
http_access deny all
```

Logs Squid
